Full Description

Part Group (lenses + figurines):

Thickness

0.39

Handle width

Form (lenses):

Height

5.32 cm

Handle thickness

Width

0.43

Diameter

Full

Verbal Description

This piece of antler was probably once a tool, but it has been so thoroughly chewed by rodents that any signs of working or use have been obliterated. It has longitudinal facets, all irregular in breadth and length. The ends are tapered, which may have been ~~there~~ originally the result of human activity. Now the ends are thoroughly chewed. Paraphrasing the non-Pareil John Douglass, this is one ugly artifact! Not drawn.
